Ultraplex II Wireless Audio System

Panasonic's Ultraplex II... incredible audio performance and quality.

Listen... your customers' orders will always be crystal clear with Panasonic's Ultraplex II™ Wireless Audio System. It's the new drive-thru communication system from Panasonic, the company with a world renowned reputation for audio excellence, quality and reliability. Plus, the Ultraplex II was ergonomically redesigned for greater comfort with a super-flexible headband and ultra light belt pack. It's the perfect solution for clear and reliable wireless audio communication.

Crystal Clear Communication

Hear your customers with crystal clarity. Panasonic's Ultraplex II offers best-in-class Digital Noise Reduction technology. Eliminate distracting background noise and focus on the most important sound – your customers' voices.

Experience Panasonic Quality

Even under the most demanding conditions you can rely on the Ultraplex II to deliver consistent and superior performance day after day. Panasonic's proven reputation for excellence in audio makes the Ultraplex II the clear choice for your drive-thru operations.

Feature Rich

Panasonic's Ultraplex II incorporates the latest technology to deliver uncompromising solutions and enhance your business operations.

- Offering full-day battery life, you can focus on servicing your customers, not servicing your headsets.
- Needed in the kitchen and servicing dine-in? No problem! The Ultraplex II has split-signal reception and transmission that allows you to go where you're needed while maintaining clear, uninterrupted communication.
- Stay connected with customers using the full duplex capabilities of the Ultraplex II.
- Customize your drive-thru solution. The Ultraplex II offers a cable-free All-In-One headset order taker or a conventional headset with belt pack order taker.

Your choice is clear. The Panasonic Ultraplex II is your best wireless audio solution.

Cable-Free/Hands-Free Solution

The Ultraplex II All-In-One (AIO) headset order taker is a self-contained, one-piece unit designed for convenience and durability. It features an adjustable headband for comfort with no cables to get in the way!

- Friendly and intuitive controls for standard functions – Talk, Page, Lane Selection and Volume. User buttons with finger guides have proven, highly reliable positive-feel contact switches with audible tones for function verification.
- Hands-free and dual-lane/tandem operations are programmable on the go using a combination of user buttons.
- User visible indicator lights and color on the mic boom indicate AIO headset status, including A/B dual-lane/tandem select and one-touch hands-free talk lock.
- Light indicators on the headset display power and low battery status.

Clear & Natural Audio in a Conventional Headset

The traditional, lightweight Ultraplex II headset with belt pack order taker incorporates a dynamic speaker/microphone with swivel extension for enhanced acoustic quality and user convenience. Connected to the headset by cable, the belted Ultraplex II order taker is easy to wear and use for extended periods.

- Easy access nylon and Velcro case and one-button battery eject allow for quick battery change.
- The compact, ergonomically designed belt pack order taker is lightweight and comfortable to wear for hours at a time.

Battery Management

Panasonic Ultraplex II battery management provides the longevity that busy operations demand. Whether you're using the conventional headset with order taker belt pack, or the AIO headset, you benefit from full-day battery operation – up to 20 hours!

- Variable power draw batteries are smart charged in 5 hours or less, and provide up to 600 charges per battery for the conventional headset order taker. An optional four-port charger with built-in conditioner slot for extended battery life can be wall-mounted for space considerations.
- Maintenance-free lithium ion batteries with no memory effect power the AIO headset order taker. The optional all-day battery extends operating time up to 20 hours per charge. A flexible, smart four-port charger recharges both all-day and standard AIO lithium batteries.
